SCHEME AND CURRICULUM OF EXAMINATIONS OF TWO-YEAR DEGREE PROGRAMME

Session: 2024-25

List of Interdisciplinary (ID) Courses

Name of ID Course	Course Code	Semester
Effective Communication Skills	IDEC-1101	I
	IDEC-3101	III
Basic Fundamentals of Music (Vocal)	IDEM-1362	I
	IDEM-3362	III
Human Rights and Constitutional Duties	IDEH-1313	I
	IDEH-3313	III
Basics of Computer and IT	IDEI-1124	I
	IDEI-3124	III
Indian Heritage: Contribution to the world	IDEW-1275	I
	IDEW-3275	II

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Developmental Botany
Course Code: MBTL-3071

Course outcomes:

After passing this course the student will be able to:

CO1: Compare the function and morphology of pollen grains.

CO2: Understand various aspects related to fertilization and endosperm development.

CO3: Understand different aspects of embryo development.

CO4: Understand the role of Embryology in Taxonomy and Plant Breeding.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Developmental Botany
Course Code: MBTL-3071

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

Unit-I

Pollination:

Ultrastructural and histochemical details of style and stigma, self and interspecific incompatibility, significance of pollen-pistil interaction, role of pollen pistil interaction, role of pollen wall proteins and stigma surface proteins, barriers to fertilization, methods of overcoming incompatibilities, intra-ovarian pollination, in vitro pollination.

Unit-II

Fertilization:

Heterospermy, differential behaviour of male gametes, discharge and movement of sperms, syngamy and triple fusion, post fertilization metabolic and structural changes in embryo sac.

Endosperm:

Types, ultrastructure, cellularization in nuclear endosperm, endosperm haustoria, their extension and persistence, function, storage, metabolites, endosperm culture.

Unit-III

Embryo:

Polarization of zygote, embryogenic types, histology and organogenesis of dicotembryos, organelles (undifferentiated) embryos, delayed and differentiation of embryo, structure, cytology and function of suspensor, physiological and morphogenetical relationship of endosperm and embryo, embryo culture for rescue of hybrid embryo. Polyembryony: Types, genetic and somatic, pollen embryos.

Apomixis:

Apospory, Parthenogenetic Development of Embryo, Importance. Seed: Growth and Development, Seed Appendages.

Session: 2024-25
Master of Science (Botany) Semester-III

Unit-IV

Embryology & Taxonomy:

Diagnostic embryological characters, Primitive and advanced characters, Role of embryology and palynology in taxonomy.

Role of Embryology in Plant Breeding:

Embryology of hybrids, disfunction of endosperm, arrested development of embryo.

Reference Books:

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Molecular Biology
Course Code: MBTL – 3072

Course outcomes:

After passing this course the student will be able to:

CO1: Gain knowledge about DNA sequencing and RNA processing.

CO2: understand different techniques related to molecular biology.

CO3: understand the structures and purposes of cloning vehicles.

CO4: gain knowledge about genetic cloning and genomics & proteomic techniques.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Molecular Biology
Course Code: MBTL – 3072

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

Unit-I

The Law of DNA constancy and C-value paradox, DNA sequencing. Organization of transcriptional units; mechanism of transcription of prokaryotes and eukaryotes; RNA processing (capping polyadenylation, splicing, introns and exons); ribonucleo–proteins, structure of mRNA.

Unit-II

Recombinant DNA technology, host cell restriction, restriction endonucleases, DNA ligases, topoisomerases, gyrases and methylases. Cloning strategies, selection and screening of recombinant clones, genomic DNA and cDNA libraries, biological and physical containment of recombinant DNA clones. Agarose gel electrophoresis, Southern/Northern/ Western blotting.

Unit-III

Cloning vehicles, plasmids, bacteriophages, viruses, cosmids, Ti-plasmid, CaMv plasmid, construction of plasmid vectors, M13 vectors, their use in cloning and sequencing, expression vectors, lysogeny and lytic cycles in bacteriophages.

Unit-IV

Genetic colonization of plants by Agrobacterium infection and tumour growth, Ti – plasmids, neoplastic transformation of plant cells, organization of T-DNA, nucleotide sequences of T-DNA. PCR, DNA fingerprinting by RAPDs and RFLPs.

Genomics and proteomics: Genetics and physical mapping of genes, molecular markers for transgenic plants, artificial chromosomes, high throughput sequencing, genome projects, bioinformatics, functional genomics, microarrays, protein profiling and its significance.

Session: 2024-25
Master of Science (Botany) Semester-III

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Breeding and IPR
Course Code: MBTL –3073

Course outcomes:

After passing this course the student will be able to:

CO1: Understand sources and types of genetic variation and explain their importance for plant improvement.

CO2: Understand historical evolution of plant breeding and different centers of origin.

CO3: Describe methods that are used in plant breeding.

CO4: Understand IPR (Intellectual property right)

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Breeding and IPR
Course Code: MBTL –3073

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

Unit-I

Primary and secondary centres of diversity, utilization of wild plants in crop improvement, introduction and domestication as methods of plant breeding.
Types and introduction, vegetative sexual and apomictic, their effects on generating and fixing genotypic variation, male sterility and self-incompatibility mechanisms.

Unit-II

Breeding systems of crop species; systems of mating in sexually reproducing species and their genetic consequences. Breeding methods for self- and cross-pollinated crops; pureline and mass selection, recurrent selection and clonal selection.
Hybridization in self- and cross-pollinated crops. Inbreeding depression and hybrid vigor, genetic and physiological basis of heterosis, hybrid varieties, synthetic and composite varieties.

Unit-III

Breeding for disease resistance, classification of resistance, responses of the host to pathogens, variability systems of pathogenic fungi, breeding disease resistant varieties; multiline varieties.
Heritability, genetic advance, correlation of characters, path analysis, multiple comparison test, discriminant function and cluster analysis.

Unit-IV

Mutations, aneuploidy and polyploidy as methods of plant improvement, interspecific and intergeneric hybrids, role of genetic engineering.
Intellectual Property Rights: (IPR/TRIPS), International Intellectual Property System; Plant Variety Protection; the regular patent systems, trade secrecy, biosafety; laws and conventions related to intellectual property rights.

Session: 2024-25

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Biochemistry
Course Code: MBTL – 3074

Course outcomes:

After passing this course the student will be able to:

CO1: Understand cellular chemistry and interactions.

CO2: Understand the structure and metabolism of carbohydrates.

CO3: Describe structure, functions and the metabolism of lipids.

CO4: Understand kinetics of enzyme catalyzed reactions and enzyme inhibitory and regulatory processes.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Biochemistry
Course Code: MBTL – 3074

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

Unit-I

Cellular Chemistry: Covalent and non-covalent interactions, hydrogen bond, electrostatic interactions, hydrophobic interactions, Van der Waals forces and their significance, structure and properties of water and its biological significance, pH and its significance, pH scale, Henderson-Hasselbalch equation, buffers (inorganic and organic) and their importance, ATP- the energy currency, phosphorylation / dephosphorylation of proteins.

Unit-II

Metabolism of Carbohydrates: Overview of intermediary metabolism, carbohydrates and lipids of physiologic significance, glycolysis and oxidation of pyruvate, citric acid cycle, catabolism of acetyl- CoA, metabolism of glycogen, gluconeogenesis and control of the blood glucose, pentose phosphate pathway and other pathways of hexose metabolism like uronic acid fructose metabolism pathways.

Unit-III

Lipid Metabolism: Biosynthesis of fatty acids, oxidation of fatty acids, ketogenesis, metabolism of fatty acids, ketogenesis, metabolism of acylglycerols and sphingolipids, lipid transport and storage, cholesterol, synthesis, transport and excretion, integration of metabolism and provision of tissue fuels.

Unit-IV

Enzymology: Introduction to enzymology, history of enzymes, nomenclature and classification.

Specificity of enzymes: group specificity, absolute specificity, stereochemical specificity. Mechanism of enzyme catalysis: Activation energy, Nature of active sites, enzyme-substrate complex, induced fit hypothesis, strain and distortion theory.

Enzyme Kinetics: Michaelis-Menton Equation, Lineweaver-Burk plot. Regulation of enzyme activity and concentration: Brief account of enzyme induction and repression, covalent modification, isoenzymes and allosteric enzymes

Session: 2024-25
Master of Science (Botany) Semester-III

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Applied Botany
Course Code: MBTL – 3075

Course outcomes:

After passing this course the student will be able to:

CO1: Demonstrate knowledge of the value of plants in our everyday lives.

CO2: Understand commercial use of different forest products.

CO3: Describe various industrial plant products.

CO4: Understand chemical processing of different products in applied botany.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Applied Botany
Course Code: MBTL – 3075

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

Unit-I

Food Plants: History and nature of food plants, major and minor cereals, legumes and pulses, vegetables, fruits and nuts. Extraction of sugar from sugarcane. Flow diagram of the process with a critical study of the steps involved, problems faced by the sugar industry in India. By-products of sugar industry, distillation of alcohol and other products with special reference to distilleries in Punjab. Food adjuncts: Spices condiments and other flavoring agents, beverages, fumitory and masticatory materials; functional foods.

Unit-II

Forest Products: Wood & Oak. Physical characteristics of Indian woods, methods of seasoning and chemical treatment of specialized use, fireproofing of the wood. Industrial manufacturing of packing material and plywood and the classifications of plywoods according to their use. Some important commercial woods: *Dalbergia spp.*, *Shorea robusta*, *Tectonagrandis*, *Cedrus deodara*, Bamboo-the 'greengold' of India.

Unit-III

Industrial Plant Products: Essential oil yielding plants of India, their use in perfumery, vegetable oils, fats and waxes, starches and other cellulose products. Manufacturing of paper and board from raw plant material. Manufacturing of crude and high-quality paper, recycled paper; bio fuel producing plants.

Fibres: Different types of fibre yielding plants, classification of fibres, physical and chemical processes involved in the manufacturing of fibre.

Unit-IV

Rubber and Latex Products: The Rubber Plants of India, latex yielding plants, Extraction of Raw Rubber and its Chemical Processing for the Manufacturing of Finished Rubber. Sources of gums and resins and their classifications according to their chemical nature. Extraction of the raw resin and down the line processing for turpentine and other products. Sources of natural dyes and tannins in India and their extraction methods, merits and limitations of plant-based dyes.

Session: 2024-25
Master of Science (Botany) Semester-III

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Morphogenesis
Course Code: MBTL – 3076

Course outcomes:

After passing this course the student will be able to:

- CO1: Learn about morphogenesis and organogenesis in plants.
- CO2: Understand differentiation in plants.
- CO3: Describe plant regeneration processes and tissue relationships.
- CO4: Understand different factors affecting plant morphogenesis.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Plant Morphogenesis
Course Code: MBTL – 3076

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

Unit-I

Correlation: Physiological and genetic correlations.

Polarity: Polarity as expressed in external and internal structures, polarity in isolated cells, polarity in plasmodia and coenocytes, physiological manifestations of polarity, developmental patterns.

Unit-II

Symmetry: Inorganic and organic symmetries, radial symmetry bilateral symmetry, dorsi-ventral symmetry, development of symmetry.

Differentiation: Growth and differentiation, differentiation as expressed in structure, external and internal differentiation, differentiation during ontogeny, differentiation in relation to environment, physiological differentiation, differentiation without growth.

Unit-III

Regeneration: Regeneration in lower plants, regeneration in higher plants, reconstitution, restoration, reproductive regeneration.

Tissue Mixtures: Stock – scion interrelations, chimeras, somatic mutations.

Unit-IV

Abnormal Growth: Abnormal development of organs, production of new types of organized structures, amorphous structures.

Morphogenetic Factors: Introduction to factors-light, water temperature, physical factors, genetic factors and chemical factors in general.

Session: 2024-25
Master of Science (Botany) Semester-III

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Botany Practicals I
Course Code: MBTP-3077

(Based on MBTL-3071, MBTL-3072 and MBTL-3073)

Course Outcomes:

After passing this course the student will be able to:

CO1: Perform immobilization of enzymes.

CO2: Wide application of enzymes and their future potential.

CO3: Perform different experiments based on plant pollination.

CO4: Understand embryology of dicot and monocot plants.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Practical-I
Course Code: MBTP-3077
(Based on MBTL-3071, MBTL-3072 and MBTL-3073)

LTP: 0-0-6

Max. Marks- 75

Theory - 60

CA – 15

Examination Time: 6 hrs.

Instructions for the Paper Setters: Question paper is to be set on the spot jointly by the Internal and External Examiners. Two copies of the same may be submitted for the record to COE Office, KanyaMahaVidyalaya, Jalandhar.

Suggested Practical's from MBTL-3071

1. Examination of the following with the help of hand sections, dissections and prepared longitudinal, transverse of Flowers: Transmitting tissue/canal in the stigma and style, Various types of flowers and placentation, Special types of flowers with emphasis on vasculature of androecium and gynoecium.
2. Study from permanent preparations, development and structure of anther, pollen, ovules, megasporogenesis, embryo sac, endosperm and embryo.
3. Study of microsporogenesis and gametogenesis in sections of anther.
4. Examination of modes of anther dehiscence and collection of pollen grains for microscopic examination (maize, grasses, *Cannabis sativa*, *Crotolaria*, *Tradescantia*, *Brassica*, *Petunia*, *Solanum melongena*).
5. Test for pollen viability using stain and in vitro pollination. Pollen germination using hanging drops, sitting drop culture and suspension culture.
6. Estimating percentage and average pollen tube length in vitro.
7. Field study of several types of flowers with different pollination mechanisms (wind, insects, bird pollination)

Suggested Practical's from MBTL-3072

1. Identification of the parts of bright- field microscope and demonstration of its use and care.
2. Perform basic microbiological techniques such as sterile plating and isolation of single colonies.
3. Isolation of DNA from biological samples.
4. Characterization of isolated DNA using agarose gel electrophoresis.
5. Graph and analyze agarose gel data.
6. Genetic transformation of bacteria.
7. Screening and selection of transformants.
8. Demonstration of PCR technique.
9. Spectrophotometric estimation of DNA.
10. Demonstration of DNA sequencing technique.

Suggested Practical's from MBTL-3073

1. Floral biology in self- and cross-pollinated species,

2. Selfing and crossing techniques.
3. Numerical exercises on probability and biostatistics
4. Maintenance of experimental records;
5. Learning techniques in hybrid seed production
6. To study Breeders kit.
7. Studies on centres of origin of various useful crops.
8. To study Vegetative Propagation in – Potato, Onion bulb, Sugarcane, Ginger.
9. To perform exploration for determination of male sterility.
10. To perform Field exploration for determination of Dichogamy, Heterostyly and Dioecy.
11. To estimate Pollen viability in *Zea mays* and *Hibiscus*.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Botany Practicals II
Course Code: MBTP-3078
(Based on MBTL-3074, MBTL- 3075 and MBTL-3076)

Course outcomes:

After passing this course the student will be able to:

CO1: Understand concept of gene, gene cistron relationship in prokaryotes and eukaryotes.

CO2: Understand types of DNA damage, DNA repair pathways.

CO3: Exhibit clear and concise communication of scientific data.

CO4: Understand different techniques related to molecular biology.

Session: 2024-25
Master of Science (Botany) Semester-III
Course Title: Botany Practicals II
Course Code: MBTP-3078
(Based on MBTL-3074, MBTL- 3075 and MBTL-3076)

LTP: 0-0-6

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 6 hrs.

Instructions for the Paper Setters: Question paper is to be set on the spot jointly by the Internal and External Examiners. Two copies of the same may be submitted for the record to COE Office, KanyaMahaVidyalaya, Jalandhar.

Suggested Practical's based on MBTL-3074

1. Preparation of the solutions of different concentrations. Preparation of the inorganic and organic buffers of different conc. and pH.
2. Preparation of the standard curve of protein and determine the protein content in unknown samples by Lowry's method.
3. Estimation of the protein content in given plant sample by Bradford's method
4. Estimation of the protein content in given plant sample by Biuret's method
5. Estimation of the carbohydrates in given plant sample Anthrone's reagent.
6. Estimation of the carbohydrates in given plant sample Dubois's method
7. Estimation of the activity of enzyme catalase
8. Estimation of the activity of enzyme peroxidase.
9. Preparation of the standard curve of proline and determine the proline content in unknown samples by Bates's method.
10. SDS-PAGE for soluble proteins extracted from the given plant material and comparison of their profile by staining with Coomassie brilliant blue.

Suggested Practical's based on MBTL-3075

To study economic importance, distribution, centres of origin of following specimens:

1. Study of morphology and microchemical tests for stored food material for cereals: Wheat (*Triticum aestivum*), Rice (*Oryza sativa*), Maize (*Zea mays*)
2. Study of morphology and microscopic study of fibres: Cotton (*Gossypium sp.*), Jute (*Corchorus capsularis*), Flax (*Linum usitatissimum*) Sugar yielding plant: Sugarcane (*Saccharum officinarum*)
3. Study of morphology of oil yielding plants: Groundnut (*Arachis hypogea*), Mustard (*Brassica sp.*), Coconut (*Cocos nucifera*), Castor (*Ricinus communis*), Soyabean (*Glycine max*) and performing tests for oil.
4. Study of morphology and alkaloid present in spices: Ginger (*Zingiber officinale*), Turmeric (*Curcuma longa*), Coriander (*Coriandrum sativum*), Clove (*Eugenia aromaticum*), Black Pepper (*Piper nigrum*), Cinnamon (*Cinnamomum zeylanicum*)
5. Study of morphology and medicinal value for medicinal plants: Amla (*Emblica officinalis*), Bahera (*Terminalia bellerica*), Harhar (*Terminalia chebula*),

- Sarpagandha(*Rauwolfia serpentine*), Ashwgandha (*Withaniasomnifera*), Liquorice (*Glycyrrhizaglabra*), Poppy (*Papaversomniferum*), Arjuna (*Terminaliaarjuna*)
6. Study of morphology and nutrition value for pulses: Green Gram (*Phaseolus aureus*), Black Gram (*Phaseolus mungo*), Pigeon Pea (*Cajanascajan*), Kidney Bean (*Phaseolus vulgaris*)
 7. Study of morphology of plants producing fruits Citrus (*Citrus sp*), Apple (*Maluspumila*), Mango (*Mangiferaindica*), Banana (*Musa sapientum*), Pineapple (*Ananascomosus*), Grapevine (*Vitissp*)
 8. Vegetables: Potato (*Solanumtuberosum*), Radish (*Rapahnussativus*), Turnip (*Brassica rapa*)
 9. Study of morphology of Beverages: Tea (*Thea sinensis*), Coffee (*Coffea arabica*) and knowledge of processing method.

Suggested Practical's based on MBTL-3076

1. Emasculation, bagging, hand pollination to study pollen germination, seed set and fruit development.
2. Study of cleistogamous flowers and their adaptations.
3. Study of nuclear and cellular endosperm through dissection and staining.
4. Isolation of zygotic globular, heart shaped, torpedo stage and mature embryos from suitable seed.
5. Study of seed dormancy and methods to break dormancy
6. Study the primitive and advanced characters of plants in angiosperms
7. Study various methods of asexual reproduction and vegetative reproduction
8. Study effects light, gravity, humidity temperature on plants
9. To study effect of bending on plant morphogenesis.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Plant Anatomy
Course Code: MBTL –4071

Course outcomes:

After passing this course the student will be able to:

- CO1: Compare anatomy of primary and secondary growth in roots as well as shoots.
- CO2: Understand anatomy of different types of woods and their commercial utilization.
- CO3: Understand floral, fruit and seed anatomy.
- CO4: Relate anatomy of the plant part with their physiological role.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Plant Anatomy
Course Code: MBTL –4071

LTP:3-0-0

Max. Marks-75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

UNIT-I

The Shoot and Root System: Primary structure and basic vasculature, the root-stem transition, secondary growth in stems and roots, the origin of cambium and its activity, anomalous secondary growth, polycyclic vasculature, secondary meristems, origin and function, the role of pericycle, phellogen, phellem, phelloderm, distribution of sclerenchyma in leaves, stem and roots.

Nodal Anatomy: Types of nodes in dicots and monocots, the node-internode transition, formation of leaf and branch traces.

UNIT-II

Histology of Wood: Growth rings, types and ultrastructure of tracheids, vessels and wood rays, longitudinal parenchyma and its arrangement, grain and texture, knots, formation of resin cavities and tyloses, anatomy and chemistry of lignification, physical and anatomical features of common hard and soft woods of India, importance of density and weight in commercial utilization of woods.

UNIT-III

Floral Anatomy: The anatomy of floral axis and the whorls, the leaf origin of carpel, evidences from anatomy of essential and accessory whorls.

Fruit and Seed Anatomy: Gross and ultrastructural surface features of the fruits and seeds, role in taxonomy, internal anatomy of dicot and monocot seeds, organ and cellular anatomy of typical monocot and dicot seeds.

UNIT-IV

Laticifers and Lenticels: Types and distribution, anatomy in relation to physiological roles

Functional Anatomy: Anatomy of leaf in relation to photosynthesis and transpiration, modification of the root stem and leaf anatomy in relation to habit and habitat with special reference to aquatics, nitrogen fixers, xerophytes parasites and mycorrhizas.

Session: 2024-25
Master of Science (Botany) Semester-IV

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Structure and Metabolism of Plant Hormones
Course Code: MBTL – 4072

Course outcomes:

After passing this course the student will be able to:

CO1: Understand the history and role of different types of plant hormones in growth and development of plants.

CO2: Understand the mechanism of common plant hormones, bioassays and their commercial use.

CO3: Understand biosynthesis, action and uses of New class of plant hormones.

CO4: Relate microbial association with the production of growth regulators.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Structure and Metabolism of Plant Hormones
Course Code: MBTL – 4072

LTP: 3-0-0

Max. Marks- 75
Theory 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

UNIT-I

General Features of Plant Hormones, their Analysis, and Quantitation: Discovery of auxin and other hormones, characteristics of plant hormones, hormone vs plant growth regulator, hormonal responses to a physiological state, bioassays, hormone extraction, analysis, and quantitation, determination of hormone synthetic pathways, regulation of hormone levels (hormonal homeostasis).

Auxins: Structure of auxins, physiological roles of IAA, IAA biosynthesis in higher plants, regulation of IAA levels (IAA homeostasis), inhibitors of IAA action, other naturally occurring auxins, synthetic auxins, structural diversity of auxins.

UNIT-II

Gibberellins: Discovery, structure of gibberellins (GAs) in higher plants, physiological roles of GAs in higher plants, terpenoid pathway, biosynthesis of GAs, regulation of GA levels in the plant, endogenous levels, why are there so many GAs?, other substances with GA-like activity.

Cytokinins: Discovery, biological functions and bioassays, structure of cytokinins, occurrence of cytokinins in the cytoplasm and as components of tRNA, relative distribution of natural cytokinins among plants, biosynthesis in higher plants, regulation of cytokinin levels, synthetic compounds with cytokinin like activity, cytokinin antagonists (anticytokinins).

UNIT-III

Brassinosteroids: Discovery, structure and distribution, physiological roles and bioassays, biosynthesis of brassinolide, synthesis mutants and their wild-type genes, inhibitors of brassinosteroid biosynthesis, brassinosteroid structure and biological activity regulation of castasterone and brassinolide levels.

Abscissic Acid: Discovery, structure and occurrence in plants and fungi, physiological roles of abscissic acid (ABA), biosynthesis of ABA, carotenoid and/or ABA synthesis, mutants, ABA synthesis inhibitors, regulation of ABA levels.

Ethylene: Discovery as a hormone, structure, distribution, and internal concentrations, physiological roles and bioassays, biosynthesis in higher plants, ethylene synthesis mutants, regulation of ethylene levels in the plant, synthetic compounds that produce ethylene, inhibitors of ethylene action.

UNIT-IV

Jasmonates and other Defense-Related Compounds: Introduction, discovery, distribution, and

structure of jasmonates, physiological roles of jasmonates, biosynthesis of jasmonic acid (JA), JA synthesis mutants, JA synthesis inhibitors, regulation of endogenous levels of JA.

Microbial Synthesis of Plant Hormones: Microbial associations with plants, infection by *Agrobacterium*, tumor induction by *Pseudomonas*, microbial genes involved in IAA and CK biosynthesis, expression of bacterial genes in higher plants, biology of genetic transformation by *A. tumefaciens*, production of plant hormones by other microorganisms.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Plant Tissue Culture and Biotechnology
Course Code: MBTL – 4073

Course outcomes:

After passing this course the student will be able to:

CO1: Understand the concept of cytogenetics, differentiation in cell and tissue culture and mechanism, advantage and disadvantages of micro-propagation.

CO2: Understand the mechanism of production of disease resistant, herbicide resistant and pathogen free plants.

CO3: Describe the role of tissue culture in the production of different types of transgenic plants.

CO4: Explain the role of plant tissue culture and biotechnology in different fields of human interest.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Plant Tissue Culture and Biotechnology
Course Code: MBTL – 4073

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

UNIT-I

Introduction and Historical aspects of Tissue Culture, Micropropagation: Stages, Types, Cytogenetics and differentiation in cell and tissue culture, plant regeneration from callus, shoot apex culture and anthers. Somatic embryogenesis, usefulness, hardening of micropropagated plantlets, advantages and disadvantages, application of the technique in crop improvement.

UNIT-II

Somaclonal variations and isolation of useful mutants at cellular level, disease resistance, herbicide resistance and salt tolerance. Production of pathogen free plants through tissue culture. Production of artificial seeds, their use and application.

UNIT-III

Techniques for the production of transgenic plants: Concept, vector less transgenesis, gene targeting tools, crop improvement through transgenics, benefits and risk of producing transgenic plants, commercialization of transgenics. Cell culture and secondary metabolites like cinnamic acid, shikonin, flavonoids and related compounds production.

UNIT-IV

Cryobiology of plant cell cultures and establishment of plant banks, freeze preservation technology, factors influencing revival of frozen cells and future prospects. Terminator technology, verminator technology, apprehensions and challenges. Role of plant tissue culture and biotechnology in agriculture, medicine and human welfare, prospects of genetic engineering of plants.

Session: 2024-25
Master of Science (Botany) Semester-IV

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Analytical Techniques
Course Code: MBTL – 4074

Course outcomes:

After passing this course the student will be able to:

CO1: Understand working of different microscopes.

CO2: Understand the basics of the major analytic techniques including sample preparation, standardization and data analysis of each technique.

CO3: Understand working of different spectroscopy techniques.

CO4: Understand theory and practice of different blotting techniques.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Analytical Techniques
Course Code: MBTL – 4074

LTP: 3-0-0

Max. Marks- 75
Theory -60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

UNIT-I

Principles and application of light, phase contrast, fluorescence scanning and transmission electron microscopy, cytophotometry and flow cytometry, fixation and staining.

UNIT-II

Principles and applications of gel filtration, ion-exchange and affinity chromatography, thin layer and gas chromatography, high pressure liquid chromatography (HPLC), electrophoresis and electrofocussing, ultra-centrifugation (velocity and density gradient).

UNIT-III

Principles of biophysical methods used for analysis of biopolymeric structure, X-ray diffraction fluorescence UV/CD, visible Nuclear Magnetic Resonance (NMR) and Electron Spin Resonance (ESR) spectroscopy, hydrodynamic methods, Atomic absorption and plasma emission spectroscopy.

UNIT-IV

Principles and techniques of nucleic acid: hybridisation and Cot curves; Sequencing of proteins and nucleic acids; Southern, Northern and Western blotting techniques; Polymerase chain reaction.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Diversity and Biology of Angiosperms
Course Code: MBTL – 4075

Course outcomes:

After passing this course the student will be able to:

- CO1: Learn about different systems of classification with their merits and demerits.
- CO2: Understand principles of plant nomenclature, origin of angiosperms and phylogeny.
- CO3: Understand the role of various fields of biology in plant taxonomy.
- CO4: Understand the concepts of taxonomic tools, aspects related to phytogeography and local plant diversity.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Diversity and Biology of Angiosperms
Course Code: MBTL – 4075

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

UNIT-I

Historical perspective of plant classification, phenetic versus phylogenetic system; cladistics in taxonomy, relative merits and demerits of major system of classification, a study of phylogenetic system of classification after Engler&Prantl, Bessey, Hutchinson, Cronquist, Takhtajan, Dahlgren and Thorne.

UNIT-II

Principles of plant nomenclature; salient features of the International code of Botanical Nomenclature, working knowledge of botanical latin, important herbaria of the World. Origin of angiosperms; interrelationships of dicots and monocots; Phylogeny of Ranales, Amentiferae, Centrospermae, Tubiflorae and Helobiales and their treatment in the modern systems of classification.

UNIT-III

Principles of plant taxonomy, alpha taxonomy vs modern taxonomy; chemotaxonomy, cytotaxonomy, numerical taxonomy, anatomy, palynology and embryology in relation totaxonomy. Biosystematic approach to taxonomy, biosystematic categories parameters in biosystematic analysis with particular examples of taxonomic problems; taxonomic study of agamic, hybrid and polyploid complexes; phylogenetic trees.

UNIT-IV

Taxonomic tools: Herbarium; floras; serology; electrophoresis; nucleic acid hybridization; computers and GIS. Concepts of phytogeography and its relevance, phytogeographic regions of the world and India, approaches to phytogeography, principles and practices; factors determining vegetational types, endemism, hotspots and hottest hotspots, plant explorations, invasions and introductions, local plant diversity and its socioeconomic importance.

Session: 2024-25

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Hazardous Chemicals
(Optional Paper)
Course Code: MBTL-4076(Opt-I)

Course outcomes:

After passing this course the student will be able to:

CO1: Understand different types of hazardous chemicals and how we can expose to them.

CO2: Understand control measures that reduce the risk associated with hazardous chemicals.

CO3: Manage hazardous chemicals effectively.

CO4: Describe the processes involved in hazardous waste treatment.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Hazardous Chemicals
(Optional Paper)
Course Code: MBTL-4076 (Opt-I)

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

UNIT-I

Physical Properties of Chemicals: Vapour pressure, vapour density, solubility, octanol/water partition, coefficient odor.

Toxic Properties: Absorption and excretion detoxification and bioactivation, common terms used for toxicology.

Target Organs: Injury to liver, kidney, immune system, respiratory tract, skin, eyes, nervous system, cardiovascular system, carcinogens and teratogens.

Combustible and Explosive Properties: Flashpoint and autoignition temperature of some chemicals, explosive properties.

UNIT-II

Aldehydes: Acrolein.

Alkaloids: Nicotine, Morphine, Heroin, LSD, Colchicine.

Amines: Ethylenimine, aniline, benzidine, O-toluidine, Phenylhydrazine.

Azodyes: Acid Yellow 3, Sudan orange, acid red 18, acid blue-9, acid green-3.

Chlorohydrins: Ethylene, chlorohydrin.

Nitriles: Acrylonitrile, acetonitrile.

Cyanides: HCN, Sodium cyanide, potassium cyanide, cyanogen.

Organic Isocyanates: Methyl isocyanate.

UNIT-III

Dioxins: 2,3,7,8 – Tetrachlordibenzo-p-dioxin (TCDD).

Epoxy Compounds: Ethylene dioxide.

Halogenated Hydrocarbons: Chloroform, carbon tetrachloride, dichlorobenzene.

Aromatic Hydrocarbons: Benzene, Xylene.

Polynuclear Aromatics: Benzo - α - pyrene, Benzo - α - anthracene.

Toxic Gases: Arsine, Mustard Gas, Phosgene.

Explosives: Nitroexplosives – Nitroglycerine, dynamite, Nitrocellulose, 2,4,6-Trinitrotoluene, Picric acid

UNIT-IV

Pesticides: Structure, LD50/ LC50, health hazards and exposure limit of following pesticides:

Carbamates: Aldicarb, Carbaryl, Carbofuran, Methiocarb.

Organochlorines: Aldrin, Dieldrin, Endrin, Heptachlor, Chloradane, Endsulphan, DDT, Methoxychlor, Lindane.

Organophosphorus Pesticides: Parathion, Dichlorophos, Monocrotophos, Chloropyriphos.

Herbicides: 2,4 D, 2,4, T, Silvex, Atrazine, Metribuzin, Monouron, Diuron, Paraquat, Tribunil, Alchlor

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Immunology
(Optional Paper)
Course Code: MBTL-4076(Opt-II)

Course outcomes:

After passing this course the student will be able to:

CO1: Understand history and principles of immunology.

CO2: Conceptualize how the antigen is processed.

CO3: Understand the working of Antibodies.

CO4: Understand the cells and tissues of the immune system.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Immunology
(Optional Paper)
Course Code: MBTL-4076(Opt-II)

LTP: 3-0-0

Max. Marks- 75
Theory - 60
CA – 15
Examination Time: 3 hrs.

Instructions for the Paper Setters:

Eight questions of equal marks (i.e. twelve marks each) are to be set, two in each of the four sections (A-D). Questions of section (A-D) should be set from Unit (I-IV) of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any section.

UNIT-I

An Overview of the Immune System: Historical perspective, an introduction to the immune system – innate and adaptive immunity. Immuno deficiencies: secondary immunodeficiency disorders.

UNIT-II

Antigens and Antigen Recognition: Antigens: prerequisites for immunogenicity, relative immunogenicity of different types of molecules, Molecules that enhance immunogenicity. Activators of lymphocytes: antigens, superantigens, mitogens. Antigen recognition by cells of innate immunity & adaptive immunity.

UNIT-III

Antibodies: Gamma globulins; structure, bifunctional property of antibodies, determining bifunctionality, cross reactivity, Antigen antibody interactions: primary interactions, secondary interactions. Classification of antibodies: Isotypes, Allotypes, properties & biological functions of antibody isotypes, IgG, IgE, IgM, IgD, IgA, Monoclonal antibodies

UNIT-IV

Cells and Tissues of Immunity: Lymphoid tissues: primary & secondary lymphoid tissues, cells of innate immunity: phagocytes, antigen presenting cells, natural killer cells, Eosinophils, mast cells and basophil, B- cells, secondary immune responses. The major histocompatibility complex, antigen process and antigen presentation, complement. The immune system in Health & Disease, specially AIDS.

Session 2024-25
Master of Science (Botany) Semester-IV
Course Title: Botany Practicals I
Course Code: MBTP -4077

(Based on MBTL-4071, MBTL-4072 and MBTL-4073)

Course outcomes:

After passing this course the student will be able to:

CO1: Develop skills of dissection, formation of temporary and permanent slides.

CO2: Understand commercial applications of plant growth hormones.

CO3: Perform bioassays of plant growth regulators.

CO4: Study the functions and operations of various instruments used in PTC

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Botany Practicals I
Course Code: MBTP -4077

(Based on MBTL-4071, MBTL-4072 and MBTL-4073)

LTP: 0-0-3

Max. Marks- 75

Theory - 60

CA – 15

Examination Time: 6 hrs.

Instructions for the Paper Setters: Question paper is to be set on the spot jointly by the Internal and External Examiners. Two copies of the same may be submitted for the record to COE Office, KanyaMahaVidyalaya, Jalandhar.

Suggested Practicals based on MBTL-4071

1. Study of apical meristems with the help of dissections, whole mount preparations, sections and permanent slides.
2. Study of xylem and phloem elements using maceration, staining, light and electronmicrographs (xerophytes, hydrophytes and halophytes).
3. Study of secretory structures (nectaries and laticifers).
4. Study of leguminous roots with different types of nodules.
5. Anatomical studies of young and mature stem of *Helianthus*.
6. Comparative anatomy of dicot and monocot root, stem and leaf
7. To study anomalous stem behaviour in stem (*Mirabilis jalapa*, *Nyctanthus*, *Boerhaaviadiffusa*, *Bignonia*, *Dracaena*.)
8. Study of anatomical features in xerophytes e.g. (leaf of *Nerium*. stem and leaf of *Calotropis*, phyllocladode of *Ruscus*.)
9. Study of anatomical features in hydrophytes e.g. (*Nelumbopetiole*, *Hydrillastem* and leaf, *Eichhorniapetiole*, leaf lamina, *Typha*)
10. To study anatomy of storage roots of e.g. (*Raphnussativa*, *Beta vulgaris*.)
11. To study anatomy of halophytes e.g. (*Chenopodiumstem*)
12. To study permanent tissues slides.

Suggested Practical's based on MBTL-4072

1. Study the effect of IAA on morphological parameters such as shoot length, root length, fresh weight and dry weight of seven days old seedlings.
2. To study the effect of IBA on morphological parameters such as shoot length, root length, fresh weight and dry weight of seven days old seedlings.
3. Study the effect of Gibberellins on morphological parameters such as shoot length, root length, fresh weight and dry weight of seven days old seedlings.
4. Study the effect of Cytokinin on morphological parameters such as shoot length, root length, fresh weight and dry weight of seven days old seedlings.
5. Estimation of the catalase activity by Aebi's Method.
6. Study of bioassays of Auxins, Gibberellins, Cytokinin, Ethylene, Abscisic Acid and Brassinosteroids.
7. Study of antagonistic effect of cytokinin/ethrel on senescence behavior of leaves of different field crops.

Suggested Practical's based on MBTL-4073

1. To study the functions and operations of various instruments used in PTC like Laminar Air Flow, Autoclave, incubators, oven, Distillation unit, Weighing balance, pH meter
2. Laboratory design set up of PTC lab Sterilisation techniques
3. Different types of Enclosures used in PTC
4. Preparation of stock solutions and media preparation
5. Selection, preparation and inoculation of explant Synthetic Seed Production
6. Micropropagation and its different steps. Significance of growth hormones in culture
7. Induction of callus from different explants Anther culture and ovary culture

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Botany Practicals II
Course Code: MBTP -4078

(Based on MBTL-4074 and MBTL-4075)

Course outcomes:

After passing this course the student will be able to:

CO1: Understand and perform experiments based on different analytic techniques.

CO2: Identify different plants using identification keys.

CO3: Explore rich plant biodiversity.

CO4: Compare different species of a genus and different genera of family.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Botany Practicals II
Course Code: MBTP -4078
(Based on MBTL-4074 and MBTL-4075)

LTP: 0-0-2

Max. Marks- 75

Theory - 60

CA – 15

Examination Time: 4 hrs.

Instructions for the Paper Setters: Question paper is to be set on the spot jointly by the Internal and External Examiners. Two copies of the same may be submitted for the record to COE Office, KanyaMahaVidyalaya, Jalandhar.

Suggested practicals based on MBTL-4074

(Experiments based on following techniques):

1. Paper Chromatography
2. Thin Layer chromatography
3. Column chromatography
4. Gel Filtration Chromatography
5. Ion Exchange Chromatography
6. Affinity Chromatography
7. Electrophoresis: AGE and SDS-PAGE
8. UV-Vis Chromatography
9. Demonstration of PCR
10. Centrifugation
11. Fluorescent Microscopy

Suggested Practicals based on MBTL-4075

Description of specimen from representatives of locally available families. This list is indicative only

- Ranunculaceae: *Ranunculus*, *Delphinium*,
- Brassicaceae: *Brassica*, *Iberis*
- Malvaceae: *Hibiscus*
- Rutaceae: *Murraya*, *Citrus*
- Fabaceae: *Lathyrus*, *Cassia*, *Acacia*, *Mimosa*
- Rosaceae: *Rose*, *Prunus*
- Asteraceae: *Helianthus*, *Ageratum*, *Sonchus*
- Apiaceae: *Coriandrum*, *Foeniculum*
- Apocynaceae: *Vinca*, *Nerium*, *Thevetia*
- Asclepiadaceae: *Calotropis*
- Solanaceae: *Petunia*, *Solanum*, *Datura*
- Euphorbiaceae: *Euphorbia*, *Phyllanthus*
- Lamiaceae: *Ocimum*, *Salvia*
- Chenopodiaceae: *Chenopodium*
- Liliaceae: *Asparagus*, *Asphodelus*
- Poaceae: *Triticum*, *Avena*

1. Location of key character and use of keys at family level.

2. Field trips within and around the campus; compilation of field note and preparation of herbarium sheets of such plant, wild or cultivated as are abundant.
3. Training in using flora and herbaria for identification of specimen described in the class
4. Comparison of different species of a genus and different genera of family to calculate similarity coefficients.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Field Study and Research Techniques
Course Code: MBTP -4079

Course outcomes:

After passing this course the student will be able to:

CO1: Understand plant collection, their preservation and importance in taxonomic studies

CO2: Understand a general definition of research design

CO3: Identify the overall process of designing a research study from its inception to its report.

CO4: Understand ethical issues in educational research.

Session: 2024-25
Master of Science (Botany) Semester-IV
Course Title: Field Study and Research Techniques
Course Code: MBTP -4079

LTP: 0-2-0

Max. Marks- 50
Evaluation Report - 40
CA – 10

Field Study:

1. Collection of Plants identification and preservation
(a) from local excursion (short) (b) Major excursion (long)
2. Preparation of Herbarium.
3. Preservation of collected plant species.
4. Submission of report for every field study
5. Submission of compiled herbarium at the time of End Sem. Exam.

Research Techniques:

1. Introduction: Research design, principles, execution of work, interpretation of results.
2. Review of literature: Structure of a scientific library, journals, books, Digital library and E books
3. Layout of a Research Paper, Journals in Botanical Science, Impact factor of Journals
4. Google Scholar, Open source, bibliography management system.
5. Methods of data collection
6. Data analysis: Measures of Central tendencies (Mean, mode, median,) Standard deviation, the variance and coefficient of variation, Correlation and regression, ANOVA using SPSS
7. Ethics in research related to publishing, Plagiarism and Self-Plagiarism

Reference Books:

2. Bairagi, V., & Munot, M. V. (Eds.). (2019). *Research methodology: A practical and scientific approach*. CRC Press.
3. Jain, S. (2019). *Research methodology in arts, science and humanities*. Society Publishing.

Session: 2024-25
Master of Science (Botany) Semester-IV
Interdisciplinary compulsory course
Course Title: EFFECTIVE COMMUNICATION SKILLS
Course Code: IDEC-1101/ IDEC-3101

LTP: 4-0-0

Max. Marks- 100
Theory - 80
CA – 20

Instructions for the Paper Setter:

The question paper will consist of four sections. The candidate will have to attempt five questions in all selecting one from each section and the fifth question from any of the four sections. Each question will carry 16 marks. **(5x16=80)**

Unit - I

Introduction: Basic Communication, Basic forms of Communication, Principles of effective Communication, Strategies to overcome barriers to Communication

Unit - II

Reading Skills: Model of Reading to learn – Reading tactics and strategies; Reading outcomes: Paraphrasing / Précis – writing and Summary writing, Note Taking

Unit - III

Modern Forms of Communication- E- mail Writing, New Media Writing (Blog and Report Writing etc.), Notice, Agenda, Minutes, Business Letters, Personal Letters, Job Application, Resume Writing

Unit - IV

Making Power Point Presentation, Telephonic Skills, Public Speaking, Interview Skills,

Books Recommended:

1. John Seely: *Oxford Guide to Effective Writing and Speaking* OUP
2. Geetha Nagaraj – *A Course in Grammar and Composition*, Foundation Books, 2006

Session: 2024-25
Master of Science (Botany) Semester-IV
Inter Disciplinary Course
Course Title: Basic Fundamentals of Music (Vocal)
Course Code: IDEM-1362/ IDEM-3362

LTP: 2-0-2

Total Marks: 100

Theory: 40

Practical: 40

CA: 20

(Theory)

Note: Instructions for the Paper Setters:

The paper setter will set Eight questions of equal marks. Two in each of the four Sections (A-D). Questions of Sections A-D should be set from Units I-IV of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any Section.

Unit – I

1. Define Music. Explain the types of Music.
2. Knowledge of following basic Technical Terms of Music: Swara, Saptak, Arov, Avroh, Alankar.

Unit - II

3. Definition and Explanation of the following musical terms: Vadi - Samvadi - Anuvadi – Vivadi.
4. Concept of Raga & Jatties of Raagas.
5. Importance of Laya & Tala in the Hindustani Music.

Unit – III

6. Life Sketches: Tansen, Pt. Vishnu Narayan Bhaskhande.
7. Role of Multimedia in the promotion of Music.
8. Ability to write notations of any light composition in prescribed talas.

Unit – IV

9. Brief knowledge of following Ragas: Yaman, Bhairavi.
10. Ability to write notations of following talas: Teental, Kehrawa, Dadra, Roopak

(Practical)

Time - 20 Minutes

Marks - 40

Instructions for the paper setter:

Question paper is to be set on the spot jointly by the Internal and External Examiners.

1. Basic knowledge of playing Harmonium/Key - Board.
2. Ability to Sing ten Alankars with the instrument of your choice.
3. Ability to sing three light compositions (Bhajan/Shabad/Cinematic/Sufi/Folk Songe.t.c.) based on Ragas.
4. Knowledge and ability to recite the following Talas on hands:
 - Teentaal (16 Beats)
 - Keharva (8 Beats)
 - Roopak (7 Beats)
 - Dadra (6 Beats)
5. Ability to recite Bhajan/Shabad with Tanpura.
6. Ability to sing National Anthem with Harmonium.

Suggested Readings

- Hmare Sangeet Ratan- Sangeet Karyalya, Hathras, 2004
- Sangeet Roop - Dr. Davinder Kaur
- Sangeet Saar- Veena Mankaran
- Raag Parichay (I-IV) - Sh. Harish Chandar Srivastava
- Sangeet Visharad - Basant, Sangeet Karyalya, Hathras, 2004
- Sangeet Subodh - Dr. Davinder Kaur

Session: 2024-25

**Master of Science (Botany) Semester-IV
Interdisciplinary course**

HUMAN RIGHTS AND CONSTITUTIONAL DUTIES

Course Code: IDEH-1313/ IDEH-3313

Course Outcomes

At the end of this course student will be able to:

CO1: Understand the concept of Human rights.

CO2: Analyse different types of human rights.

CO3: Apply the theoretical and practical understanding of the Fundamental Duties in Indian Constitution

Session: 2024-25
Master of Science (Botany) Semester-IV
Interdisciplinary Compulsory course
Course Title: HUMAN RIGHTS AND CONSTITUTIONAL DUTIES
Course Code: IDEH-1313/ IDEH-3313

(Theory)

LTP: 4-0-0

Total Marks: 80

CA: 20

Time: 3 hours

Eight questions of equal marks are to be set, two in each of the four Sections (A-D). Each question will carry 8 marks. Questions of Sections A-D should be set from Units I-IV of the syllabus respectively. Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each section. The fifth question may be attempted from any Section.

Unit-I

INTRODUCTION TO HUMAN RIGHTS

Foundational Aspects: Meaning, Nature, Characteristic, Classification.

International Framework: Constituents of the Universal Declaration of Human Rights (UDHR).

Unit-II

Constitutional Realisation in India: Fundamental Rights (Part III, Constitution of India). **Protective Mechanism in India:** The composition, Powers and Functions of the National Human Rights Commission of India (NHRC).

Unit III

INTRODUCTION TO HUMAN DUTIES

Conceptual Perspective: Meaning, Nature & Characteristics of Human Duties.

Intellectual discourses: Classification of Human Duties; Relevance of Human Duties.

Unit IV

Constitutional Recognition in India: Fundamental Duties in Indian Constitution, Part IVA.

Session: 2024-25
Master of Science (Botany) Semester-IV
Interdisciplinary Compulsory course
Course Title: BASICS OF COMPUTER
Course Code: IDEI-1124/ IDEI-3124

Course Outcomes:

After passing this course the student will be able to:

CO1: Comprehend basics of internet and its working.

CO2: Apply the concepts for better e-mail management.

CO3: Apply office suite to create professional documents, sheets and presentations.

Session: 2024-25
Master of Science (Botany) Semester-IV
Interdisciplinary Compulsory course
Course Title: BASICS OF COMPUTER
Course Code: IDEI-1124/ IDEI-3124

UNIT - I

Introduction to Internet: Meaning, Working of Internet, Benefits/Services offered by Internet, Internet Service Providers, Web browsing, World Wide Web, TCP/IP, HTTP, FTP and DNS.

Basics of E-mail: Introduction, Advantages and disadvantages, Structure of an e-mail message, working of e-mail (sending and receiving messages), managing e-mail (creating new folder, deleting messages, forwarding messages, filtering messages).

UNIT - II

Introduction to Word Processing: Features, Graphical User Interface (Title bar, Menu bar, Status bar and Ruler), understanding the Ribbon, Quick Access Toolbar

Working with Document: Creation of New Documents, Opening Document, Saving Document, Printing Document

Editing: Font Properties, Alignment, Deleting, Moving, Find and Replace

Page Layout: Page Setup, Margins, Gutters, Page Breaks, Header & Footer

Managing Data through Tables: Creating a Table, Entering and Editing Text in Tables. Changing format of Table, Changing height and width of Row/Column. Deleting Rows/Columns.

Advance Concepts: Adding Picture, Page Colors and Watermarks, Borders and Shading, Drawing Objects, Insert Equations, Spell Checker and Thesaurus.

UNIT - III

Introduction to Spreadsheet: Basics, Components of Excel Window, Concept of Worksheets. Creation, Saving, Opening and Closing Workbook, Printing of Worksheet.

Editing Spreadsheet: Editing Data, Formatting Data, Sort and Filters.

Formula and Functions: Ways to Enter Formula in Sheet, Operators, Types of Functions, Application of Functions.

Data Representation in Sheet: Inserting Graphs, Managing Graph Data, Modifying Graph Elements.

UNIT - IV

Introduction to Presentation: Exploring Menus, starting a New Slide, Opening Existing Presentation, Saving Presentation, Printing Slides.

Working with Slides: Inserting Slide, Deleting Slide, Copying and moving slides, Duplicating Slides, Layout of Slides, Applying theme to presentation, Views of Presentation,

Editing and Formatting Slides: Font Formatting, Text Alignment, Bullets and Numbering. Displaying Slide Show.

Multimedia: Adding Multimedia, Slide Transitions, Applying Animation, Timing Slide Display, Adding Video & Sounds, Adding Objects.

Session: 2024-25
Master of Science (Botany) Semester-IV
Interdisciplinary Compulsory course
Course Title: Course on Indian Heritage: Contribution to the World
Course Code: IDEW-1275/IDEW-3275

Course Objectives:

- This course introduces the course with the contribution of the Indus valley Civilisation in the field of Planned cities, metallurgy and its contact with the civilisations of the world.
- It will introduce students to the contribution of ancient India in the field of Art, Architecture and Literature.
- This course will make students familiar with sources and nature of Indian religious history and human values. Special emphasis will be given on doctrine and philosophy of Hinduism, Buddhism and Jainism,
- Students will be made aware of the tremendous contribution of India in the field of science, medicine and technology.
- This course will acquaint students with the contribution of India in the field of education with special reference to ancient universities of Nalanda and Taxila.

Session: 2024-25
Master of Science (Botany) Semester-IV
Interdisciplinary Compulsory course
Course Title: Course on Indian Heritage: Contribution to the World
Course Code: IDEW-1275/IDEW-3275

Course Outcomes:

- After the completion of the course, the students will have a comprehensive understanding of the development of science and technology in different fields in ancient India.
- After completing the course students will have a familiarity with contribution of India in the field of Art, Architecture and Literature.
- After completing the course students will be able to appreciate the ancient wisdom and an understanding of the various religions which evolved in India.
- After completing the course students will be able to comprehend with the contribution of India in the field of education with special reference to ancient universities of Nalanda and Taxila.

Session: 2024-25
Master of Science (Botany) Semester-IV
Interdisciplinary Compulsory course
Course Title: Course on Indian Heritage: Contribution to the World
Course Code: IDEW-1275/IDEW-3275

Examination Time: 3 Hrs

Total Marks: 100
Theory: 80
CA: 20

Instructions for the Paper Setter:

The question paper will consist of four sections. The candidate will have to attempt five questions in all selecting one from each section and the fifth question from any of the four sections. Each question will carry 16 marks. **(5x16=80)**

Unit – I

1. Ancient Indian Heritage in Literature, Art and Architecture: Temple Architecture, Stupas, Ashokan Pillars, Ajanta Paintings and Monuments

Unit – II

2. Ancient Wisdom: Contribution of India in the field of education, Vedas Ancient Universities- Nalanda, Taxila

Unit – III

3. Indian Culture and Human Values: Hinduism, Jainism, Buddhism

Unit – IV

4. Contribution in the field of Science and Technology: Medicine, Astronomy, Mathematics,
